

# Maryland Weekly Influenza Surveillance Activity Report

A summary of influenza surveillance indicators reported to DHMH for the week ending December 29, 2012

Prepared by the Office of Infectious Disease Epidemiology and Outbreak Response  
Prevention and Health Promotion Administration  
Maryland Department of Health and Mental Hygiene

## SUMMARY

During the week ending December 29, 2012, influenza-like illness (ILI) intensity in Maryland was **HIGH** with **WIDESPREAD** geographic spread of influenza. Influenza activity indicators are at the highest levels so far this season.

### ILI Intensity Levels

Minimal
Low
Moderate
✓ High

### Influenza Geographic Spread

No Activity
Sporadic
Local
Regional
✓ Widespread

## ILINet Sentinel Providers

Six sentinel providers reported a total of 1,779 visits last week. Of those, 204 (11.5%) were visits for ILI. This is **above** the Maryland baseline of 2.9%.

ILI Visits To Sentinel Providers By Age Group	This Week Number (%)	Last Week Number (%)	Season Number (%)
Age 0-4	77 (38%)	69 (21%)	513 (27%)
Age 5-24	62 (30%)	141 (43%)	760 (40%)
Age 25-49	47 (23%)	88 (27%)	442 (23%)
Age 50-64	10 (5%)	22 (7%)	110 (6%)
Age ≥ 65	8 (4%)	11 (3%)	58 (3%)
Total ILI Visits	204 (100%)	331 (100%)	1,833 (100%)

## Visits to Emergency Departments for ILI

Emergency Departments in Maryland reported a total of 50,680 visits through the [ESSENCE surveillance system](#). Of those, 2,317 (4.6%) were visits for ILI.

ILI Visits To Emergency Departments By Age Group	This Week Number (%)	Last Week Number (%)	Season Number (%)
Age 0-4	608 (26%)	497 (30%)	3,266 (31%)
Age 5-24	639 (28%)	558 (34%)	3,149 (30%)
Age 25-49	690 (30%)	407 (25%)	2,895 (27%)
Age 50-64	242 (10%)	115 (7%)	879 (8%)
Age ≥ 65	138 (6%)	68 (4%)	448 (4%)
Total ILI Visits	2,317 (100%)	1,645 (100%)	10,637 (100%)

## Neighboring states' influenza information:

Delaware <http://dhss.delaware.gov/dph/epi/influenzahome.html>  
District of Columbia <http://doh.dc.gov/service/influenza>  
Pennsylvania [http://www.portal.state.pa.us/portal/server.pt/community/influenza\\_\(flu\)/14161](http://www.portal.state.pa.us/portal/server.pt/community/influenza_(flu)/14161)  
Virginia <http://www.vdh.virginia.gov/Epidemiology/Surveillance/Influenza/>  
West Virginia <http://dhhr.wv.gov/oeps/disease/flu/Pages/fluSurveillance.aspx>

## Community-based Influenza Surveillance (MRITS and Google Flu Trends)

A total of 505 responses to the [weekly flu survey](#) (MRITS) were received. Of those, 16 (3.2%) reported ILI with a cumulative 26 days of regular daily activities lost due to illness. According to [Google Flu Trends](#), influenza activity is now “intense” in Maryland.

## Clinical Laboratory Influenza Testing

Twenty-seven clinical laboratories reported 6,542 rapid influenza tests performed. Of those, 2,009 (30.7%) were positive. Of those testing positive, 1,845 were positive for influenza type A, and 164 were positive for type B. (Rapid influenza tests are not as accurate as PCR tests. Now that the State Laboratories Administration has reported positive PCR tests for influenza, rapid positive tests are counted as lab-confirmed cases for surveillance purposes.)

Positive Rapid Flu Tests by Type	This Week		Last Week		Season	
	Number (%)		Number (%)		Number (%)	
Type A	1,845	(92%)	1,170	(92%)	3,948	(90%)
Type B	164	(8%)	107	(8%)	430	(10%)
Total	2,009	(100%)	1,277	(100%)	4,378	(100%)

## State Laboratories Administration Influenza Testing

Data from the DHMH State Laboratories Administration was unavailable for this report. The data will be updated and posted as soon as possible. (Influenza tests performed at the State Laboratory are considered the gold standard of influenza laboratory testing for influenza surveillance purposes.)

Positive PCR Tests by Type	This Week		Last Week		Season	
	Number (%)		Number (%)		Number (%)	
Type A (H1)	N/A	--	5	(3%)	13	(2%)
Type A (H3N2)	N/A	--	152	(90%)	523	(92%)
Type A (H3N2v)	N/A	--	--	--	--	--
Type B	N/A	--	12	(7%)	35	(6%)
Total	N/A	--	169	(100%)	571	(100%)

Go to <http://dhmh.maryland.gov/fluimd/SitePages/getvaccinated.aspx> and click on your county/city of residence. You will be redirected to your local health department website for local information on where to get your flu vaccine.

## Influenza-associated Hospitalizations

Hospitals in Maryland reported 143 influenza-associated hospitalizations. (A person with an overnight hospital stay along with a positive influenza test of any kind, e.g. rapid test or PCR, is considered an "influenza-associated hospitalization" for purposes of influenza surveillance.)

Influenza-Associated Hospitalizations by Age Group	This Week Number (%)	Last Week Number (%)	Season Number (%)
Age 0-4	8 (6%)	16 (16%)	58 (14%)
Age 5-17	5 (3%)	3 (3%)	22 (5%)
Age 18-24	22 (15%)	19 (19%)	74 (18%)
Age 25-49	32 (22%)	19 (19%)	84 (20%)
Age 50-64	7 (5%)	5 (5%)	25 (6%)
Age ≥ 65	69 (48%)	37 (37%)	152 (27%)
<b>Total</b>	<b>143 (100%)</b>	<b>99 (100%)</b>	<b>415 (100%)</b>

## Outbreaks of Respiratory Disease

Six outbreaks of influenza were reported to DHMH. (Disease outbreaks of any kind are reportable in Maryland. Respiratory outbreaks may be reclassified once a causative agent is detected, e.g. from ILI to influenza.)

Respiratory Outbreaks by Type	This Week Number (%)	Last Week Number (%)	Season Number (%)
Influenza	6 (100%)	2 (67%)	11 (65%)
Influenza-like Illness	-- --	-- --	3 (18%)
Pneumonia	-- --	1 (33%)	3 (18%)
Other Respiratory	-- --	-- --	-- --
<b>Total</b>	<b>6 (100%)</b>	<b>3 (100%)</b>	<b>17 (100%)</b>

## National Influenza Surveillance (CDC)

During the week ending December 29, 2012, influenza activity increased in the U.S.

- **Viral Surveillance:** Of 9,363 specimens tested and reported by U.S. World Health Organization (WHO) and National Respiratory and Enteric Virus Surveillance System (NREVSS) collaborating laboratories, 2,961 (31.6%) were positive for influenza.
- **Pneumonia and Influenza Mortality:** The proportion of deaths attributed to pneumonia and influenza (P&I) was below the epidemic threshold.
- **Influenza-Associated Pediatric Deaths:** Two influenza-associated pediatric deaths were reported and were associated with influenza B viruses.
- **Outpatient Illness Surveillance:** The proportion of outpatient visits for influenza-like illness (ILI) was 5.6%; above the national baseline of 2.2%. Nine of 10 regions reported ILI above region-specific baseline levels. New York City and 29 states experienced high ILI activity; 9 states experienced moderate ILI activity; 4 states experienced low ILI activity; 6 states experienced minimal ILI activity, and the District of Columbia and 2 states had insufficient data.
- **Geographic Spread of Influenza:** Forty-one states reported widespread geographic influenza activity; 7 states reported regional activity; the District of Columbia reported local activity; 1 state reported sporadic activity; Guam reported no influenza activity, and Puerto Rico, the U.S. Virgin Islands, and 1 state did not report.
